Personal Financial Literacy

I. Course Synopsis

Personal Financial Literacy directly aligns with the New Jersey Department of Education's revision of the Student Learning Standards. As of June 17, 2009, the State Board of Education requires, "At least 2.5 credits in financial, economic, business, and entrepreneurial literacy, effective with the 2010-2011 grade nine class." The goal of Standard 9.1 Personal Financial Literacy is that all students will develop skills and strategies that promote personal and financial responsibility related to financial planning, savings, investment, and charitable giving in the global economy. Standard 9.1 describes skills that prepare students for personal and civic financial literacy. The inclusion of Personal Financial Literacy as a standard, rather than as a strand, reflects the growing need for 21st-century citizens to be financially literate, particularly in light of the increasing number of financial choices they face due to the global economy. Financial literacy includes the application of knowledge, skills, and ethical values when making consumer and financial decisions that impact the self, the family, and the local and global communities. Seven specific strands are addressed and taught throughout the curriculum. These strands include: income and careers; money management; credit and debt management; planning, saving, and investing; becoming a critical consumer; civic financial responsibility; insuring and protecting. Student's individual learning styles and abilities are addressed through differentiated instruction as well as through different modalities of learning including the infusion of technology into daily lessons. Upon completion and passing of this course students will earn 2.5 credits and fulfill the Personal Financial Literacy graduation requirement.

II. Philosophy & Rationale

New Jersey Student Learning Standards Standard 9 21st Century Life and Careers

- In today's global economy, students need to be lifelong learners who have the knowledge and skills to adapt to an evolving workplace and world. To address these demands, Standard 9, 21st Century Life and Careers, which includes the 12 Career Ready Practices, establishes clear guidelines for what students need to know and be able to do in order to be successful in their future careers and to achieve financial independence.

Mission: 21st century life and career skills enable students to make informed decisions that prepare them to engage as active citizens in a dynamic global society and to successfully meet the challenges and opportunities of the 21st century global workplace.

Vision: To integrate 21st Century life and career skills across the K-12 curriculum and in Career and Technical Education (CTE) programs to foster a population that:

- Continually self-reflects and seeks to improve the essential life and career practices that lead to success.
- Uses effective communication and collaboration skills and resources to interact with a global society.
- Is financially literate and financially responsible at home and in the broader community.
- Is knowledgeable about careers and can plan, execute, and alter career goals in response to changing societal and economic conditions.
- Seeks to attain skill and content mastery to achieve success in a chosen career path.
