AP Chinese Language & Culture

I. Course Synopsis

The AP Chinese Language & Culture curriculum is designed for intermediate/pre-advanced language learners. 90%+ of all classroom communication will take place in the target language. Instruction focuses on developing reading, writing, speaking, and listening skills aligned with the New Jersey Student Learning Standards Initiative and the College and Career Readiness Anchor Standards for World Languages. Throughout the year, students will explore six thematic units which are each anchored by an essential question and a cumulative goal to benchmark the development of language proficiency. Students will engage in lessons that are differentiated, interactive, and characterized by authenticity. Instructional methods and materials will provide for diversification across ability levels. The students will be exposed to and will explore a variety of authentic resources, informational texts and electronic sources. Assessment will be on-going and will include performance-based tasks, reading comprehension and writing samples that further demonstrate and confirm the acquisition of language skills. Cultural practices and products from people of different parts of the Chinese speaking world are incorporated routinely so that students may develop a sense of cultural plurality and thereby expand to reshape their world view.

II. Philosophy & Rationale

A. Modes of Communication:

The ability to communicate is at the heart of knowing another language. Communication can be characterized in many different ways. The approach used within the New Jersey and national standards is to recognize three

communicative modes that place primary emphasis on the context and purpose of communication. The three modes are:

The interpretive mode: Students understand and interpret within the appropriate cultural context spoken and written communication. Examples of one way reading or listening includes but are not limited to the cultural interpretation of texts, movies, radio and television broadcasts and speeches. Interpretation differs from comprehension because it implies the ability to read and listen “between the lines.”

The interpersonal mode: Students engage in direct oral and/or written communication. Examples involving two way interactive communication are conversing face-to-face or exchanging personal letters or email messages.

The presentational mode: Students present through oral and/or written communications information, concepts and ideas to an audience of listeners or readers with whom there is no immediate personal contact. Examples of this “one to many” mode of communication are making a presentation to a group or writing an article for the school newspaper.

B. “Can Do” statements

The NCSSFL-ACTFL Can-Do Statements are self-assessment checklists used by language learners to assess what they “can do” with language in the Interpersonal, Interpretive, and Presentational modes of communication. The checklists are best used by learners and learning facilitators as part of an overall reflective learning process that includes:

- setting goals
- selecting strategies

- self-assessing
- providing evidence
- reflecting before setting new goals

C. Proficiency vs. Performance

The American Council of Teachers of Foreign Languages (ACTFL) advises us to measure students' learning in terms of *proficiency* rather than performance. Language proficiency refers to a student's ability to communicate spontaneously in a language in a non-rehearsed context. It also refers to the degree of skill with which a student uses culturally appropriate language to read, write, listen and interpret the target language in real-world scenarios. ACTFL has identified eleven different levels of language proficiency.

D. Integrated Performance Assessment

The Integrated Performance Assessment (IPA) is a cluster assessment featuring three tasks, each of which reflects one of the three modes of communication--Interpretive, Interpersonal and Presentational. The three tasks are aligned within a single theme or content area, reflecting the manner in which students naturally acquire and use the language in the real world or the classroom. Each task provides the information and elicits the linguistic interaction that is necessary for students to complete the subsequent task. They are standards-based, performance-based, developmental in nature, integrative. IPAs are designed to be used with scoring rubrics to show expectations.
